

Date: 12th May 2026

TO WHOM SO EVER IT MAY CONCERN

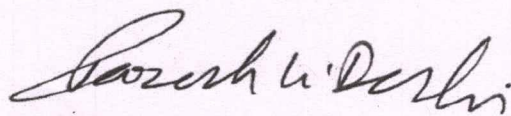

This is to certify that **Mr. Jackson Christopher**, aged 26 years old male from Kenya is suffering from Rubral Tremors post Road Traffic Accident (RTA) in 2008 . On his first examination via Online Consultation dated 07th May 2026, it has been evaluated that he has left rubro dentate tremors & also has history of falls . He also has walking difficulty & speech is not clear. Despite being on the most optimal medical management he has failed to get desired relief. In view of this he is strongly recommended undergoing ViM / GPi Deep Brain Stimulation (DBS) surgery with Rechargeable pacemaker along with Directional leads at Jaslok Hospital to control his worsening of Rubral Tremors symptoms as this is only active line of treatment available.

The cost of (Vim / GPi) DBS surgery with Rechargeable pacemaker along with Directional leads at Jaslok Hospital & Research Centre in "B" class i.e Twin Sharing class is approx. USD 35000 equivalent to Rs.35,00,000/- (Rupees Thirty Five Lakhs Only) which includes 10 days of hospitalization stay including Room Charges , Investigations , Operation theatre charges , Surgeon Fees , Anaesthetic charges, Equipment & Special surgical charges of Dr Paresh Doshi , Programming charges , Cost of DBS implants including Rechargeable pacemaker along with Directional leads , Remote , Recharger , Medicines & Consumables etc.

In case of any additional hospitalization stay, investigations, expert consultation, extra medicines & consumables it will billed as per actuals.

Bank details removed for donor safety

With Kind Regards
